Doctor Management Module Documentation

Module Name

Doctor Management

Purpose

This module allows administrators to:

- View doctor profiles.
- Add new doctors.
- Update doctor information.
- Delete doctor profiles.
- Manage consultation fees and specializations.
- Upload doctor photographs.

Only ADMIN users should have access to this module.

Frontend Page

admin-doctors.html

Features

View Doctors

Displays:

- Doctor Photo
 - Doctor Name
 - Qualification
 - Specialization
 - Experience
 - Consultation Fee
 - Actions
-

Add Doctor

Admin can add:

- Doctor Name
 - Qualification
 - Specialization
 - Experience
 - Consultation Fee
 - Doctor Photo
-

Edit Doctor

Admin can modify:

- Name
- Qualification
- Specialization
- Experience
- Consultation Fee

Delete Doctor

Admin can remove doctor profiles.

Confirmation popup should be displayed before deletion.

The screenshot displays a web application interface for managing doctors. At the top, there is a dark green header with the text "Manage Doctors" on the left and a "Dashboard" button on the right. Below the header, the main content area is titled "Doctor Profiles". It features a table with columns for "Photo", "Name", "Experience", "Fee", and "Actions". A single row is visible for "Dr. N. G. Muraleedhara" with "10 Years" of experience and a fee of "₹200". To the right of the table are "Edit" and "Delete" buttons. A modal form titled "Edit Doctor" is open in the center, containing input fields for "Doctor Name" (Dr. N. G. Muraleedhara), "Qualification" (BAMS), "Specialization" (Panchakarma Specialist), "Experience" (10 Years), and "Fee" (₹200). An "Update Doctor" button is at the bottom of the modal. A "+ Add Doctor" button is located in the top right corner of the main content area.

admin-blog.html

Module Name

Blog Management

Purpose

This module enables administrators to:

- View all blogs.
- Create new blogs.
- Edit existing blogs.
- Delete blogs.
- Categorize blogs.
- Display blogs on the public website.

Only users with ADMIN role should have access to blog management.

Frontend Page

admin-blogs.html

Features

View Blog List

Displays:

- Blog ID
 - Blog Image
 - Blog Title
 - Category
 - Author
 - Published Date
 - Edit Action
 - Delete Action
-

Add Blog

Redirects to:

add-blog.html

Admin can enter:

- Blog Title
 - Blog Category
 - Author Name
 - Blog Content
 - Featured Image
 - Publish Date
-

Edit Blog

Redirects to:

edit-blog.html?id={id}

Admin can modify:

- Title
- Category
- Content
- Image
- Author

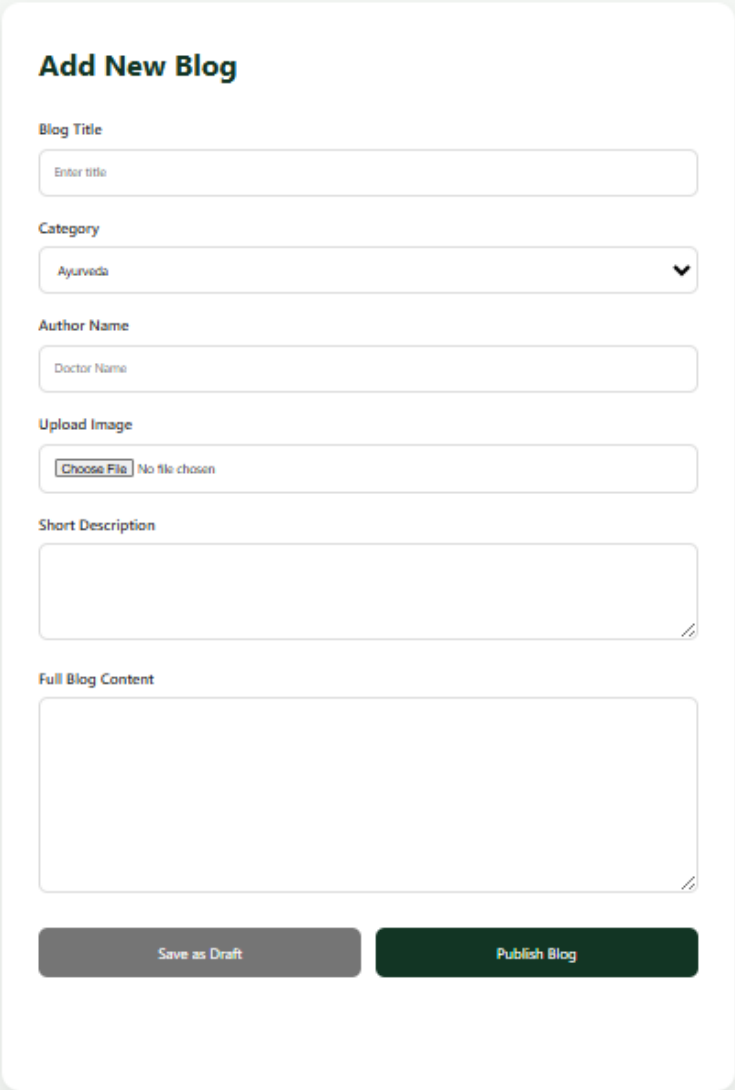

- Publish Status

Delete Blog

Remove blog from database.

Confirmation popup should be shown before deletion.

add-blog.html

The image shows a web form titled "Add New Blog" on a light green background. The form is a white card with rounded corners. It contains several input fields: "Blog Title" with a placeholder "Enter title", "Category" with a dropdown menu showing "Ayurveda", "Author Name" with a placeholder "Doctor Name", "Upload Image" with a "Choose File" button and "No file chosen" text, "Short Description" with a text area and a pencil icon, and "Full Blog Content" with a larger text area and a pencil icon. At the bottom are two buttons: "Save as Draft" (grey) and "Publish Blog" (dark green).

Save as Draft Publish Blog

Module Name

Add Blog

Purpose

This module allows administrators to create new blogs and save blogs as drafts before publishing them to the website.

Only users with ADMIN role should have access.

Frontend Page

add-blog.html

Features

Create New Blog

Admin can enter:

- Blog Title
 - Category
 - Author Name
 - Blog Image
 - Short Description
 - Full Blog Content
-

Save as Draft

Blog status:

DRAFT

Draft blogs are stored in database but are not visible to users.

Publish Blog

Blog status:

PUBLISHED

Published blogs become visible on:

- [blog.html](#)
 - [blog-details.html](#)
 - Home page blog section
-

Blog Categories

Supported Categories

- Ayurveda
- Yoga
- Panchakarma
- Naturopathy
- Lifestyle

Additional categories can be added later.

[edit-blog.html](#)

[Module Name](#)

Edit Blog

[Purpose](#)

This module allows administrators to update existing blog posts.

Administrators can:

- Modify blog title.

- Change category.
- Update author information.
- Replace blog image.
- Edit short description.
- Edit complete blog content.
- Save changes.

Only users with ADMIN role should have access.

Frontend Page

edit-blog.html

Features

Load Existing Blog

When admin clicks Edit from Blog List:

```
edit-blog.html?id=1
```

Frontend calls:

```
GET /api/blogs/{id}
```

and fills the form with existing blog data.

Editable Fields
